International Standards and Guidelines for QA in TE

A Talk with Global Tertiary Education Experts

24th of January 2023
Some household matters on the ZOOM platform

- Note, the session will be recorded for a wider dissemination and outreach purposes.

- Please, use the Q&A function to share with us the questions you want to be addressed by the speakers.

- Use the chat box for other purposes.
In response to the global trends and challenges: the values the ISGs offer...

Diversification of HE provisions:
- cross-border
- Online
- Formal
- Non-formal (e.g., micro-credentials)

Diversification of QA provisions:
- Cross-border
- Online
- Short learning programs
  Enhancement continuum
  Evaluation of each EQAP as per fit

As much as international best practice is good, QA still needs to serve the context and culture

Academic Freedom | Autonomy | Integrity | Independence | Inclusiveness | Collaboration | Diversity

End of the day what actually matters is whether the results of our efforts are recognized

Guidance for HEIs and QA providers on the mechanism to promote recognition of qualifications

Evaluation of evaluators at an international level

More and more governments require reinstating trust in QA provisions

One size does not fit it all!

Relevance

Core Values of HE

Absolute essentials for a success of HE!

Recognition

Trust

Evaluation of each EQAP as per fit

Diversity & Inclusion

Standards need to also address the specific needs of HE systems and respond to socio-economic needs of a country
International Standards and Guidelines of Quality Assurance in Higher Education: the essence

Baseline Standards (mandatory)
All types of QA providers

Specific standards to tailor to the profile of a QA provider (electives)

- Cross-border: Cross border QA
- Cross-border HE
- Short Learning Programs
- Online/Blended Provisions

Quality Enhancement Continuum: the guiding principles

- Efficiency
- Relevance
- Transformation

Section 1: Baseline standards that relate to all quality assurance providers and accreditors regardless of their specific field of operations.

Section 2: Sets of selective modules of standards to cater to specific profiles of EQAPs, enabling due recognition of the increasing diversity of QA providers.

Section 3: Guiding principles to promote continuous enhancement and impact of EQAPs as per maturity level.

The scope of the external review will be defined based on the profile of the quality assurance or accreditation body

Validity of 5 years
The new guiding principles for EQAP enhancement: quality enhancement continuum

To ensure continued relevance of periodic external reviews of EQAPs, the new ISGs provide for the Guiding Principles for each new cycle of reviews as per the EQAP’s objectives.

The Guiding Principles aim to incentivize the EQAPs for continuous and more superior performance and impact at a system level with each cycle of external reviews.
